

EH3 Series

- Designed to operate essential fluid control applications in extreme conditions
- Constructed with solid-state components for increased durability and maintenance-free performance
- UV-modified, glass-filled nylon housing is durable, impact-resistant, provides long life and lower maintenance costs
- Waterproof actuator housing meets the IP68 rating of the ISO 60529 standard degree of protection provided by enclosures against water intrusion
- Waterproof actuator housing is rated NEMA 6P to protect internal components from corrosion and extends actuator life
- Actuator housing is ignition safe (Rated NEMA 7D and meets the USCG Electrical Systems Standard) to support user and environment protection
- Compact design (2 lbs.) allows for use in numerous applications
- Powerful actuator motor designed to cycle 1/4" to 1" valves in multiple applications
- Available in various cycle times to meet the specific needs of multiple applications
- Actuators available in 12-Volt DC and also 24-Volt AC and/or DC
- Variety of Control Types (On/Off, Positionable, CAN/ISO Bus, etc.)
- Variety of Feedback Options (Open/Close Limits, CAN/ISO Bus, Etc.)
- Variety of Electrical Connections (Weatherpak, Deutsch, Etc.)
